SUMMARY

Software Engineer with 4+ years building high-traffic apps using React, TypeScript, and GraphQL. A linguistics degree and 7-year background in the service industry informs a collaborative, communication-driven approach across diverse product teams.

EXPERIENCE

Software Engineer

MilliporeSigma

September 2022 – Present, St. Louis, MO (Hybrid)

- Optimize online searching and ordering experiences for sigmaaldrich.com, an international e-commerce platform with ~5M monthly users and >\$1B in annual revenue, resulting in a 10% uplift in CSAT in one quarter through strategic feature development.
- Collaborate with a global team of 10+ developers using Agile processes to deliver weekly production releases.
- Build accessible user interfaces with React and TypeScript and increase test coverage across the codebase using Jest and Playwright.
- Optimize data fetching and performance using Apollo GraphQL, Next.js, and Styled Components.
- Two-time company hackathon winning team (Google Translate Integration and Consolidated Checkout MVPs); recipient of the 'Journey Award' for technical contributions and growth.

Frontend Developer (Freelance)

Abide Assay

February – July 2023, Remote

- Engineered the frontend for abideassay.com using React and Material UI to develop an inventory search system for clinical cannabis data, enabling filtering by terpene profiles and medical effects.
- Served as an early-stage developer, collaborating with the founder to build and scale the software architecture from discovery through deployment.
- Defined the UI/UX framework and visual identity for the platform, ensuring a cohesive user flow in the absence of a designer.

Software Developer (Freelance)

Herdmap LLC

May – September 2022, Remote

- Developed the "MO Gas Tax Back" cross-platform mobile app (5,000+ downloads) using React, TypeScript, and Ionic with a serverless backend using AWS Amplify.
- Integrated AWS Textract to automate data extraction from receipts to streamline user entry.
- Collaborated remotely with the founding developer to deliver a functional MVP using Agile processes.

EDUCATION

Full Stack Development Certificate

Washington University • St. Louis, MO • January – July 2022

6-month web development program focusing on React, Node, GraphQL, and relevant tools, emphasizing agile collaboration and Git processes.

B.A. (Linguistics, Classical Languages & Literature)

Lawrence University • Appleton, WI • September 2016 – June 2020

Community Council President, Peabody Prize in Latin, Women's Lacrosse, ASL Club, Library Night Supervisor, Semester of study in Athens, Greece.

INVOLVEMENT

After-School Coding Instructor (Volunteer)

1904Coders • St. Louis, MO (Lift for Life Academy) • September 2022 – April 2023

Taught middle schoolers programming fundamentals by walking through Hedy exercises and building games with MIT App Inventor.

Assistant Team Lead (Volunteer)

AmeriCorps Emergency Response Team • St. Louis, MO • September 2020 – August 2021

- Contributed 40+ hours per week to a year-long service term, earning the U.S. Presidential Gold Volunteer Service Award (1,300+ hours).
- Led small teams on large-scale conservation and emergency response projects, including wildland firefighting and FEMA disaster response.
