SUMMARY

Software Engineer with 4+ years building high-traffic apps using React, TypeScript, and GraphQL. A linguistics degree and community service background informs a collaborative, communication-driven approach across diverse product teams.

EXPERIENCE

Software Engineer

MilliporeSigma

September 2022 - Present • St. Louis, MO (Hybrid)

- Optimize online searching and ordering experiences for sigmaaldrich.com, an international e-commerce platform with ~5M monthly users and over \$1B in annual revenue, resulting in a 10% uplift in CSAT in one quarter through strategic feature development.
- Collaborate with global teams of 10+ developers and stakeholders using Agile processes to deliver weekly production releases.
- Build accessible user interfaces with React and TypeScript and increase test coverage across the codebase using Jest and Playwright.
- Optimize data fetching and performance using GraphQL and Next.js.
- Utilize CI/CD pipelines to streamline deployment workflows and maintain high system reliability, ensuring fault-tolerant performance.
- Two-time company hackathon winning team; recipient of the 'Journey Award' in 2025 for technical contributions and growth.

Frontend Developer (Freelance)

Abide Assay

February - July 2023, Remote

- Engineered the frontend for Abide Assay's proprietary software platform using React and Material UI to develop an inventory search system for product data, enabling filtering by terpene profiles and medical effects.
- Served as an early-stage developer, collaborating with the founders to build and scale the software from discovery through deployment.
- Executed the UI/UX implementation and visual identity for the platform, ensuring a cohesive user flow in the absence of a dedicated designer.

Software Developer (Freelance)

Herdmap LLC

May - September 2022, Remote

- Developed the "MO Gas Tax Back" cross-platform mobile app (20,000+ downloads) using React, TypeScript, and Ionic with a serverless backend using AWS Amplify, implementing application metrics to monitor data extraction performance.
- Integrated AWS Textract to automate data extraction from gas receipts, streamlining the submission process for users to claim state tax refunds.
- Collaborated remotely with the founding developer to deliver a functional MVP using Agile processes.

EDUCATION

Full Stack Development Certificate

Washington University • St. Louis, MO • January - July 2022

- 6-month web development program focusing on React, GraphQL, and Node, emphasizing Agile collaboration and Git processes.

B.A. (Linguistics, Classical Languages & Literature)

Lawrence University • Appleton, WI • September 2016 - June 2020

- Community Council President, Peabody Prize in Latin, Women's Lacrosse, ASL Club, Library Supervisor, Semester of study in Athens, Greece.

INVOLVEMENT

After-School Coding Instructor (Volunteer)

1904Coders • St. Louis, MO (Lift for Life Academy) • September 2022 - April 2023

- Taught middle schoolers programming fundamentals by walking through Hedy exercises and building games with MIT App Inventor.

Assistant Team Lead (Volunteer)

AmeriCorps Emergency Response Team • St. Louis, MO • September 2020 - August 2021

- Contributed 40+ hours per week to a year-long service term, earning the U.S. Presidential Gold Volunteer Service Award (1,300+ hours).
- Led small teams on large-scale conservation and emergency response projects, including wildland firefighting and FEMA disaster response.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Styled Components, MUI, HTML/CSS, Bootstrap, Figma, UI/UX, Accessibility

Backend & Tools: Node.js, GraphQL, Apollo Client, AWS, SQL, Jest, Playwright, Git, Jira, CI/CD, Claude Code, Agile
